

It cost Milwaukee Wisconsin 30 million to get Inner City Wi-Fi. Motorola offers Wi-Fi body cams with live stream feed capabilities for just under \$400 a piece. All we would have to do is Alter the correction and Rehabilitation system in a manner we can employ these individuals and Save in labor as well as increase the success rate of individuals that would have gone to jail and not have been corrected. It's a way to house the homeless and work them with a minor per diem pay. If we can accomplish this then we would be able to accomplish a software acquisition in order to provide We the People Best in Class capabilities. We would be able to have those live stream body cams monitored by legal counsel in real time in order to prevent the excessive cost the undue burden on the courts as well as relieve some of the stressful elements of Human Resources when it comes to law enforcement. It ensures accountability and minimizes misconduct. By minimizing misconduct you will minimize the amount of civil remedies rendered in any wrongdoing. You would be able to have legal representation for both parties at the scene which would minimize the amount of arrest that we the people have to pay for and the amount of success within the Department of Corrections could ultimately rise to an explainable amount of success as into why we pay. 83% recidivism rate is a 17% success rate when you're talking Department of Corrections and Rehabilitation.If we had a choice as parents On where to send our children to Rehabilitation, would you choose a rehabilitation center that has a 17% success rate?
